Dr. James Brown Jr.
Dr. Valerie Barnes
Toni Bruner
Drew Morgan

**ALABAMA
HUMANITIES
ALLIANCE**

HUMANITIES AND WATER

Alabama is home to 132,000 miles of rivers and streams, 3,267,600 acres of wetlands, and 563,000 acres of ponds and reservoirs. These waterways are critical to the past, present, and future of our state. Helping students understand and appreciate how we depend upon our waterways is critical. Join us as we learn about our water, explore technologies that can connect students to our water, and discuss the role of humanities education to better protect our water.

Registration limited to 30 participants.

Eleven hours of PD credit
